SETH ADIBI ANKU

IT & SYSTEMS PROFESSIONAL | SOFTWARE ENGINEER | TECHNICAL SUPPORT

Accra, Ghana | +233 59 981 3635 | sethankuadibi@gmail.com | github.com/sethankuadibi | sethankuadibi.github.io

PROFESSIONAL PROFILE

Versatile information technology and software engineering professional with experience developing complete web-based systems, integrating APIs and databases, supporting Windows-based workstations, troubleshooting hardware and software, and assisting users in operational environments. Combines frontend and backend development with practical IT support, network connectivity troubleshooting, data management, secure access workflows, and technical documentation. Contributed to QGofer, an AI-powered reputation intelligence platform, and built application prototypes spanning education, enterprise assessments, cybersecurity and machine learning. Currently pursuing an MSc in Computer Science with an AI/ML focus.

TECHNICAL CAPABILITIES

IT Support & Windows Systems: Windows workstation configuration, software installation, user support, account/access assistance, printer and peripheral support, fault diagnosis, system maintenance, security-conscious troubleshooting

Servers & Infrastructure: Server–client architecture, application services, environment configuration, deployment preparation, Docker-based service orchestration, logging and troubleshooting; developing knowledge of Windows Server, Linux server administration and directory services

Networking & Connectivity: LAN/WAN fundamentals, TCP/IP, Wi-Fi, cabling, routers and switches fundamentals, connectivity diagnosis, DNS/DHCP concepts, network equipment troubleshooting

Databases & Information Systems: PostgreSQL, Supabase, SQL, relational database design, data modelling, CRUD operations, data validation, access-controlled application data, API/database integration

Full-Stack Engineering: JavaScript, TypeScript, Python, React, Next.js, HTML5, CSS3, Tailwind CSS, Django, Flask, FastAPI, REST APIs, authentication, authorization, responsive design

DevOps & Software Delivery: Git/GitHub, pull requests, code reviews, Docker, Docker Compose, environment variables, debugging, testing and deployment workflows; Terraform and cloud-infrastructure exposure

AI, Cybersecurity & Data: scikit-learn, SVM, CNN, XGBoost, SHAP, NLP concepts, data preprocessing, model evaluation, security-aware application design, dataset annotation

Business & Productivity: Microsoft Word, Excel, PowerPoint, technical documentation, user training/support, requirements analysis, stakeholder communication, data entry and records management

PROFESSIONAL EXPERIENCE

Frontend Developer | **AdwumaTech AI, Greater Accra** • Apr 2026 – Sep 2026

- Developed and refined production-facing user interfaces in React, Next.js and TypeScript, with emphasis on usability, responsive design and reusable components.
- Integrated interfaces with REST APIs and authentication flows; diagnosed UI, data-loading and application-workflow errors and coordinated fixes across frontend/backend boundaries.
- Contributed to QGofer's monitoring, saved-search, notification, sentiment/reporting, filter and dashboard experiences for AI-powered reputation intelligence.
- Supported Git-based delivery through feature branches, pull requests, code review and technical debugging; worked alongside Docker, caching, cloud and infrastructure configuration workflows.

IT Support / National Service Personnel | **Greater Accra Regional Hospital (Ridge), Accra** • Sep 2024 – Aug 2025

- Provided first-line IT support to hospital staff, diagnosing hardware and software faults and assisting with reliable day-to-day computer access.
- Helped with workstation software configuration, account/access permissions and user issues while observing confidentiality and data-protection practices.

Data Annotator | **AdwumaTech AI, Greater Accra** • Oct 2025

- Labeled, checked and organized datasets for AI/ML activities; identified missing, inconsistent and inaccurate records against project guidelines.

Data Entry Executive | Docupro, Greater Accra • Aug 2025

- Validated and maintained spreadsheet/database records, supporting accurate data entry, retrieval and confidentiality.

IT Support Intern | Global International Academy, Accra • May 2023 – Jul 2023

- Installed, configured and troubleshot computers, applications, printers, projectors, Wi-Fi and LAN connectivity; assisted teachers and students with technical issues.

SELECTED SYSTEMS & TECHNICAL PROJECTS

QGofer — AI-Powered Reputation Intelligence Platform | Professional product contribution • 2026

React, Next.js, TypeScript, REST APIs, Git/GitHub | Built/refined interfaces for monitoring brand mentions, saved topics/searches, alerts, notifications, reports, sentiment views, filters and authentication-related user journeys. Contributed to API integration, error handling and frontend performance/usability.

OpportunityHub Ghana — Opportunity Aggregation & Tracking System | Independent academic/software project •

Next.js, TypeScript, Supabase, PostgreSQL | Designed and implemented authenticated discovery of scholarships, internships and other opportunities, including search and filters, saved items, student dashboards and application-tracking workflows.

NeuroScan AI — Brain MRI Classification Research Platform | MSc research • In progress •

Python, CNN, SVM, scikit-learn, Google Colab, Next.js | Developing an MRI preprocessing, training and evaluation workflow comparing classification approaches; built research-oriented upload and dashboard interfaces. Research metrics remain distinct from live model readiness.

EduShield AI — Explainable Intrusion Detection System | Technical project • In progress •

Python, FastAPI, XGBoost, SHAP, CICIDS2017, PostgreSQL, Next.js, Docker Compose | Designed an ML-driven intrusion detection architecture with API, alert database and dashboard components; model-artifact restoration and end-to-end validation are still in progress.

AI Readiness Assessment — Enterprise Assessment Application | Software project •

React, TypeScript, responsive web UI | Developed a multi-step assessment with scoring logic, saved session progress, responsive layouts and a results/lead-capture flow.

Intelligent Job Recommendation System — NLP Matching | Software/ML project •

Python, TF-IDF, cosine similarity, SBERT | Designed CV-to-job matching workflow using text analysis and semantic similarity approaches.

DMG Parent Portal — Education Web Experience | Frontend project •

Created and refined responsive landing, navigation, sign-in and FAQ interactions for an education-focused interface.

EDUCATION

MSc Computer Science (AI/ML focus): Ghana Communication Technology University — In progress

BSc Information Technology: Ghana Communication Technology University — 2021–2024

ADDITIONAL INFORMATION

Languages: English, Ewe, Akan, Ga

Professional strengths: Systems thinking, analytical troubleshooting, technical communication, teamwork, adaptability, user support and continuous learning
